Sircal has Successfully Achieved the ISO9001:2008 and ISO14001:2004 Certification

Sircal Instruments is proud to announce that, after a rigorous assessment process by the British Standards Institute (BSI), it has been certified for both its Quality Management System and Environmental Management System to ISO 9001:2008 and ISO 14001:2004.

Sircal's Managing Director, Dr. Sean Gregory commented, "*As a world leading manufacturer in rare gas purification systems, Sircal has always insisted on and maintained the highest standards in all areas. We take these very seriously and the stringent requirements of ISO 9001 and ISO 14001 will provide a framework that ensures customer satisfaction and environmental protection is embedded in every step of our working practices.*"

The company is equally committed to upholding the ideal of corporate social responsibility which we see as an essential part of our growth and development. It has long been a cornerstone of Sircal policy to work and develop in such a way that all Sircal staff are trained and developed throughout their careers with the company, and systems are in place to promote safe working practices.

This certification endorses Sircal's ability to meet the highest standards possible in the delivery of both our products and services. It also further strengthens our commitment of "continuously improving our products and services that will meet or exceed our customers' satisfaction".

Your feedback is invaluable to us. Please don't hesitate to contact us with suggestions on how we can better improve our services to you on feedback@sircal.co.uk.

The scope of the certification covers stringent requirements in terms of: -

Quality Management:

- ✓ Customer Focus remains at the heart of our business by meeting customer requirements
- ✓ Delivering Consistent Quality of our product by monitoring and controlling our internal processes.
- ✓ Keeping our Continuous Improvement objective alive

Environmental Management:

- ✓ Managing our impact on the world around us by minimising waste and pollution
- ✓ Monitoring and improving our Environmental Performance
- ✓ Complying with our Legal Obligations
